

REMARKS

The Office Action indicates that Figures 3A through 3E may have been omitted from the application as filed. Applicant responds that this is not so. This application is a divisional of U.S. Application Serial No. 09/526,193, filed 15 March 2000, the entire disclosure of which was incorporated by reference.

In the parent application, the original of Figure 3 was a single sheet that contains designations A through E for different portions of the drawing. When formal drawings were entered in the parent case, and because the different portions of the drawing were already independently labeled, the designations of A through E were omitted. Thus, the complete drawing was filed herewith, but the reference to Figures 3A through 3E should have been omitted from the specification so that only reference to Figure 3 (which is only a single sheet) should have remained.

Thus, Applicants have herewith amended the specification so that the description of Figure 3, starting on page 17 of the application, deletes any reference to letters A through E and simply describes what is in the figure (which portions are labeled within the figure itself).

Thus, no new matter has been added and there is no need to submit a new drawing sheet or to amend the drawings in any way.

The Commissioner is authorized to charge payment of any fees required for this communication or credit any overpayment to Deposit Account No. 03-0678.
